The Modern Reference Value of Educational Books in the Song Dynasty

LIU Yu

(Collage of Humanities and Communication, Shanghai Normal University, Shanghai, 200234)

Abstract: The flourished period of Chinese education is Song Dynasty. And a great deal of educational books were produced during the period. Under the guidance of the imperial examination system, the Song government vigorously promoted the publication of educational books. The rise of academy and private school in Song Dynasty brought new vitality to educational books. The participation of booksellers enriches the types of educational books and also brought disadvantages. The educational books in the Song Dynasty divided into official publication and popular publication. In function, it can be divided into five categories: enlightenment textbooks, imperial examinations textbooks, examination reference books, special subject textbooks and private school textbooks. The prosperity of educational books in the Song dynasty laid a solid foundation for the development of the culture of the Song Dynasty. And it still has important reference value for the compilation of educational books today.

Key words: Song dynasty, history of education, educational books
